...   deal with both classified ads and accounts receivable. (A new
Accounts Receivable package integrated with **classified** and **display**
advertising was introduced in Las Vegas.) Effective with the next release,
APT says, callers will...

...been extensively revised. Changes include the development of an
integrated word processor, a new screen **display** for the **ad** form, an
interface to an inexpensive scanner for handling faxed ads and software for
putting...
...the industry these days by using fewer screens to show the required
information. It now **displays** the text of the **ad** on the screen next to
the ad form. The new look also features an attractive...

...supports more ad types (including, for example, nonprofit organizations)
and enables the cross-selling of **display** **ads** and **classifieds** .
User-selectable rate codes and customer contracts are now available. If a
customer inquires about a price, the adtaker can call up the rate formula
used to **calculate** the **price** and explain it. Alternatively, the adtaker
can use the formula to quote prices for other...reports using Crystal
Reports is easy, as is building the ad manifest to pass to **ad** dummying
systems.
      The screen **displays** are effective, using folders and tabs to move to
different phases of the ad booking...

...system looks promising, although many items remain to be added,
including the handling of ROP **display** advertising, alternate quoting of
ads , links to commercial systems and the provision of a contact-driven
canvassing system.
      AdSearch. ATS...out of the database. In this way, Open Pages also can
handle the management of **display** **ads** , logos and graphics.
      Open Pages works with Windows 3.1, 95 and NT and with...
...various pages stand with respect to deadlines; an enhanced ad management
product that handles both **classified** and **display** **ads** in the same
database; a hot- backup capability; and an interface to the Phrasea image
...ClassManagerPro package it introduced last year and replaced it with an
enhanced version that supports **display** **ads** in addition to **classified**
ads . Called AdManagerPro, it is a completely rewritten software package
that uses the same database for all types of **ads** -- **classified** liners,
classified **display** **ads** and ROP **display** **ads** . This not only makes it
possible to consolidate billing and reporting of both classified and...

...as overrides. Within the main screen, buttons are divided into
categories by function. The WYSIWYG **ad** window **displays** **classified**
ads as they will appear on the page, with logos and graphics in place.
Keyboard shortcuts...section on archiving), Cascade showed DataFlow, which

is being used to manage the production of **display   ads** and monitor the progress of ad production.

The DataFlow server takes booking information from a...built CCI's position in the North American newspaper market--particularly in the management of **display   ads** and the control of production. CCI showed its new AdDesk system, which is being developed...for report generation and a direct link into Xpress to handle the makeup of booked **display   ads** .

The system looks mature and is optimized for performance, especially for fast filing and retrieval...retaining default ads for regular customers to speed up the booking process.

CyberSell can hold **ads** in different **formats** for different publications or dates, from a common booking. Sticky notes can be associated with...a "real" circulation package should look it.

Newton for reporters. Remember the Newton? Apple's **personal** digital **assistant** , which once looked like a useful tool but never made an impact in the market...a workflow of PC and Macintosh applications. Its focus is on streamlining the production of **display   ads** and tracking the status of tasks in the editorial department, pressroom and bindery.

It organizes...

...the ad types (comp, pickup); to specify when the status will be automatically updated; to **display** the status of **ads** , including where each item currently resides and where it came from; and to change an...by inputting specific dates.

Addressing the Web. PPI also showed its WebLink product for selecting **ads** , attaching a header and **outputting** them in a standard format. It allows newspapers to treat the Internet as just another...

...one site in the U.S.

* Advertising--the first major showing of SCS/AdMax, combining **classified   ad** entry, **display   ad** entry and **ad** management since its first customer shipments in May.

* Classified pagination--the release version of SCS...and analyzes costs. Among the available reports are productivity by adtaker, volume by advertiser, corrected **ads** , unfinished **ads** , etc.

The system **displays** lists of **ads** with or without insertion orders.

SCS/Track runs on any PC, including remote units in the field.

AdMax. Like a number of other companies these days, SCS has combined **classified** and **display   ad** entry within one program, although it uses different entry forms. Unlike some others, though, SCS has gone beyond **classified** and **display** advertising to interface to SCS/Circulation to provide a single database that enables callers to...system-independent. At the Globe, it is being used to track EdPage, Architect, Full-Page **Output** , **Display   Ad** Services and **Classified** Pagination.

It uses colors to note status or content type, depending on what the operator...supports Windows client, fax

Ad-Star Publishing Technologies, which has been supplying systems for transmitting **display** and **classified   ads** for about as long as anybody, says its installed systems now transmit more than one...

...embed codes in the ad file that call for the insertion of logos, generate typographic **formats** , etc. The **ad** agency can use the same code system for all newspapers because the Ad-Star program...

...Fax Management System, receives ads by fax, automatically runs them through an OCR program, and **displays** the **ad** in two forms side by side: the image of the ad and the OCR version...

...license fee for the first year, plus $500 per month for ongoing support, an implementation **fee   estimated** at $15,000-$30,000 covering

JMB   Date: 06-Dec-05

installation and customization, and about $5,500 for hardware...founded by former Camex executive George White and colleagues. Its AdDirect system aids in transmitting **ads** in various **formats** (PDF, TIFF/IT, etc.) from an advertiser to a newspaper.
New at Nexpo was the...

...At the Nexpo show, ImageNet introduced another option for attaching an EDI job ticket to **display** **ads** for electronic transmission.
ImageNet's EDI software was developed following specifications of the Newspaper Association...

...Constable Mercury. This software module allows you to attach an EDI job ticket to a **display** **ad** and send it to a designated publisher. It was designed to minimize the amount of...other reports directly for access using the Web browser.
Mission Critical also plans to support **display** **ads** with its current AdFast and AdFast.com systems.
The AdFast.com server requires a 100...

...simple: create a database on the Web server that is fed by a newspaper's **classified** system and, using CGI scripts, **output** the information in a searchable form to the Internet. The vendors discussed here offered their ...

...with printed ones.
Links to associated information. Although print advertising offers the option of adding **display** **ads** to present a more powerful force than simple liner ads, the reader may not see the **display** **ads** . They may appear on a different page or may be separated by many other ads. With online advertising, it is possible to have a link to a **display** **ad** --or multiple **ads** and nearly unlimited volumes of different types of information-- immediately from the ad the reader Ad-Star by the Loki Group, it takes **ads** in a variety of **formats** , such as ASCII or Autologic's ICL, parses them to convert traditional classified abbreviations to...

...the advertiser's home page. Also planned for the future is the ability to handle **display** **ads** . It will parse them to produce searchable text.
Ad-Star is using the working prototype...

...to most front-end classified systems.
ClassiFacts gathers ads from 50 papers
ClassiFacts gathers Sunday **classified** and **display** **ads** for employment, real estate and automobiles from 50 newspapers. Ads not available in electronic form...register a standing request and be notified when a match enters the system. Utilities for **calculating** monthly **payments** and purchase **prices** are also included. Links to relevant information, newsgroups and a bulletin-board forum provide users...
personals product, users select icons representing their interests from a library of images. Icons are **displayed** with **ads** to make them more graphically appealing and to highlight a particular interest, such as biking...

...or search for items based on specific criteria. Before conducting a search, the system automatically **displays** the current total number of **ads** in each category next to each category name--unusual for online databases. This allows the...

...graphical approach to searching. For personals, users can search for ads locally or nationally. The **ad** count for each day is **displayed** automatically. Newspapers can opt not to provide access to national ads.

Advertisers can place ads...ability to save searches. Saved ads remain available each time the user logs on.

For **display ads** , online advertisers can input HTML tags to enliven their ads. The system also allows advertisers to view the number of times their **ad** was **displayed** . Statistics and demographic information is also available to advertisers.

For its personals product, MicroVoice plans...

...booth. ATS has the U.S. sales rights.

The system can be used with both **display** and **classified ads** . For handling **display ads** , Miles has developed a Quark Xtension called Power Collector that breaks a **display ad** down into multiple individual items that are linked back to the main ad. These individual...

...the Verity engine and a list of hits is then shown. In the case of **display ads** that are broken into smaller items, any hit that is part of a larger **display ad** is shown with a link. Clicking on the link brings up the full **display ad** through Adobe Amber as a PDF file.

It is possible also to link a **display ad** to another area on the Web where the advertiser could place another ad at extra...in Wisconsin if you click on an ad supplied from a newspaper in that area.

Ads are **displayed** in either frame- or table-based versions, depending on the browser used. (We'd like...the streams of incoming data from Internet newsgroups and listservs. The system also supports an **ad** placement scheme that **displays** banner **ads** based on certain search terms or categories.

Members can access E&P's archives back...place ads via an online form. IBM's system also allows newspapers to control the **display** of banner **ads** by defining the number of ads per page and whether the ads are static or ...with CapturePro and the plug- in. In addition, Iota is working with GMTI to place **display classifieds** on the Internet.

...   on an individual page level, to define the distribution of the
various element types-articles, **display ads** , **classified ads** ,
pictures, logos and infographics.
      Press information. It is essential to know that each specified
newspaper...

...each page-e.g., the deadline for each page at various production steps
(text input, **ad** makeup, page makeup, film **output** , plate production,
plate on press, etc.). This ensures that the printing press starts on time
...the goal of making it possible to handle all aspects of newspaper
advertising, covering both **classified** and **display ads** of all sizes
and types, and including the necessary functions for ad booking, order
handling...possible new price list.
      Altogether, the system can access up to 25 different parameters when
pricing an ad. The **price** it **calculates** , including details, is always
presented at the time of order.
      The system includes routines for...first attempted to use the full,
available space.
      The system also supports reserving space for **ads formatted** as
two-page spreads (panorama **ads**).
      The placing algorithm provides routines for different types of ad
stacking, including left, right, pyramid...

...and keep them in that position during the automatic optimization step.
      When it comes to **display ads** that appear only in certain zones or
editions, we were told that the system includes...

...reservation.
      Ad production
      Ads are produced using Euromax's proprietary text editor, TED, and its
 ad makeup application, **DisplayAd** , both of which are fully integrated
with the rest of the AMS system. This differs...

...Creator, Illustrator, etc., into its system. (See "Integration with
other products," below.)
      Using TED and **DisplayAd** . When producing an **ad** , the fastest way to
input raw text is with TED, the word processor. Text can...

...salesperson, who then turns the job over to a creative person to make up
the **ad** using the **DisplayAd** software. During input, the operator can add
separators within the text to specify formatting or...

...the workstation. It is possible to work back and forth among TED, the

preview and **DisplayAd** . However, a complex **ad** that has been produced
with **DisplayAd** will probably include too many commands to be easily
editable using TED.
        Makeup aids. The...

...to the old days-storing strings of keystrokes and recalling them as
needed.
        EPS files. **Ads** produced in EPS **format** using Xpress or Creator are
stored with the ad order number in the Unix file...part of the file server.
It also supports import of images in EPS or TIFF **format** . During page and
ad makeup, it is possible to scale and crop images. If they are scaled

Abstract (Basic): KR 2001000612 A
      NOVELTY - A method for selling lowest price product through the
   internet is provided to reduce the management cost, and overcome the
   difficulties imposed by the restricted **number of** sellers and
   products that are allowed in a shopping mall by enabling every
   individual and business that wishes to sell their products through the
   internet to voluntarily register the products and storing the
   information in the site manager's database server and to allow dynamic
   prices by enabling **several** sellers to provide **different** prices for
   the identical product.
      DETAILED DESCRIPTION - A seller connects to a web site(101) and
   conducts a comparison analyzation of the **displayed** product's **price**
   and quantity information(102). If the seller **determines** that he/she
   can sell the product at a competitive **price** , he/she logs in by
   inputting ID and password and registers his/her sales **price** ,
   quantity, and basic informations such as **payment** method and graphic
   files(103). The registered product information is registered in the DB
   server after **classified** codification(104). A search engine compares
   and searches the stored product and **price** information(105), extracts
   the lowest **price** product and its seller, and **displays** the
   information appropriate category of the web site(106). If the extracted
    price matches the pre-inputted desired purchase **price** of a
   purchaser, the purchaser is immediately contacted through e-mail,
   messenger, **telephone** , and **mobile** communication **devices** (107).
